## Principal's Report

### **South Australian Educational Leaders Conference.**

Last week I attended the combined school associations' conference with over 400 education leaders in Adelaide which focused on educational leadership issues from a South Australian perspective.

The conference provided high quality professional development for site leaders across all levels of the system and raised the profile of South Australian public school leaders.

Various Professors from across Australia, not only gave leaders an insight in their fields of study but also allowed leaders to discuss the challenges and to raise issues that will influence the political landscape for education in the future.

**Literacy** refers to reading, writing, speaking, viewing and listening effectively in a range of contexts.

In the 21st Century, the definition of literacy has expanded to refer to a flexible, sustainable command of a set of capabilities in the use and production of traditional texts and new communication technologies - ICTs, using spoken language, print and multimedia.
